## **KIM MARCILLE AMPS IT UP ON *ABUNDANT LIVING***

*Internet Radio Audience of 300,000 Learns Secrets from Science*

MIAMI, FL, August 7th, 2007—**Kim Marcille**, an expert on possibility amplification and Chief Amplifier at Possibilities Amplified, Inc., recently appeared on the Internet radio program “Abundant Living,” hosted by Rebecca Linder Hintze ([www.grapevineradio.com](http://www.grapevineradio.com)). The subject of the show was Kim’s book, ***Amp It Up!** and Other Secrets from Science for Creating the Life of Your Dreams*, to be published in 2008.

Kim’s book discusses the principles behind some of science’s latest discoveries and how to use that knowledge to increase success and abundance in every area of life. In the radio interview, as in her book, she breaks down complex scientific concepts in a way that everyone can understand, using humor and colorful examples to illustrate her techniques for creating and implementing a bold new belief system that will turn possibilities into realities for anyone.

“Science is really about how the universe works,” Kim says. “[My book] teaches you how to use science to open up to all the possibilities available to you; to create a crystal clear vision of where you want to go in life, and the scientifically-backed steps to achieving your dreams and goals.”

The interview, along with other audio programs, is available at <http://www.kimmarcille.com/resources.html>.

### **About Possibilities Amplified**

Possibilities Amplified, Inc. is a Miami-based firm that helps people and businesses discover the invisible possibilities available to them and amplify those possibilities into reality, via consulting, speaking and coaching programs.
